EDUCATION

National Institute of Technology Patna

B.Tech in Computer Science and Engineering; CGPA 8.64/10

Patna, India

Aug 2019 - July 2023

WORK EXPERIENCE

Sprinklr

Automation Engineer

Gurugram, India

October 2023 - May 2024

- Contributed on **automating the conversation AI module validations** which focuses mostly upon each request made to the chat bot and the corresponding response provided by chat bot.
- Automated the flow** of various components of dialogue trees which were like the behavior that we can apply according to different use cases. Some of the components are product recommendation, appointments etc.
- Decreased the manual effort by **80 percent** by automating the processes.

Amazon

SDE Intern

Hyderabad, India

January 2023 - June 2023

- Led the **re-architecting** of the prior system so that it could handle requests for customers who had more than **500** addresses associated with them. **Saved developer's bandwidth by 5 hours** on a **weekly basis by automating the manual process**. **Reduced the number of tickets** assigned to the team (**both sev-2 and sev-3**) by **300** on annual basis.
- Contributed to the project aimed at **decreasing system latency** so that it can perform any storage operation in **a matter of seconds** as opposed to needing to wait for deployments, ingestion, and trickle updates to occur **over the course of days**.
- Contributed to system modernization by **deprecating a legacy in-memory data store** and integrating a more scalable solution across multiple **critical APIs**. Enhanced monitoring by adding **key identifiers** to API metrics, improving traceability and debugging. Also **automated** parts of the data processing pipeline to reduce manual intervention and streamline operations.

PROJECTS

Image captioning | Python, ML/DL

Mar 2022 - May 2022

- Used **CNN** for image classification and **LSTM** for generating the captions for that classified image, highlighting the major components of that image.

Potato Disease Classification | Python, ML

Aug 2022 - Sept 2022

- Used **CNN** for classification and specification for various potato disease.

ACHIEVEMENTS AND PROFILE LINKS

- Solved 2000+ problems, Coding Profile handles:** [Leetcode](#) [GFG](#) [HackerRank](#) [CodeChef](#)
- Voluntary tutor at Sankalp - NIT Patna.**

TECHNICAL AND NON-TECHNICAL SKILLS

Programming Languages: C/C++, Java, Python.

Tools Technologies: DropWizard, Kafka, Redis, Elastic Search, SQL, Kubernetes, RESTful Web Services, Git, AWS, Jenkins, Selenium, Junit

Databases: MySQL, MongoDB

Core Fundamentals: Data Structures and Algorithms, Object Oriented Programming, Operating System, Computer Networks.

Soft Skills: Time Management, Teamwork.
